

## **CSC336 – Web Technologies – FA24**

### **Assignment 03 – CLO3**

#### **BCS 5 A&B**

Maximum Marks: 10

Submission Deadline: Dec. 25, 2024, 2355 hrs.

Design REST API as we did in the class. It should be designed according to your project and your own modules.

- This is a group task. You need to provide specifications of the overall project.
- Describe your project briefly.
- Specify Modules/Routers and mount points, Methods, Routes URIs and all the resources.
- Also specify important scenarios: the normal course of actions, alternates and possible exceptions inside the endpoints.

Good design will lead to a better implementation in your project part.

Please specify your project and group information in your document as well. Submission should be made in the form of word/pdf document with no screenshots of code.

Only 1 student should upload the document on MS Teams.
